

**BUCKTOWN ADDITION**

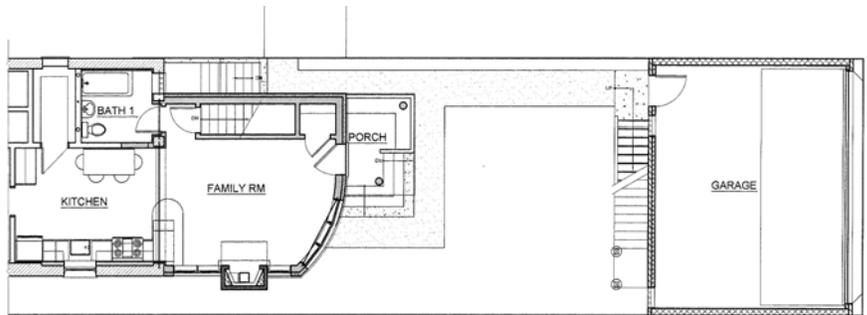

Chicago, Illinois 2007

A large two story plus basement addition at the rear of an existing house on a narrow city lot. The new design provides a Renovated Kitchen and Open Family Room at the first floor and adds space at the second floor to create a large Master Bedroom. The new spaces open to the South and East and interact with the rear yard with a balcony and covered porch. These indoor and outdoor spaces, along with a roof deck over a new garage, are also enhanced by views of the city skyline.

SOUTH AND EAST ELEVATIONS

FIRST FLOOR ADDITION – REAR YARD- GARAGE PLAN

SECOND FLOOR ADDITION – GARAGE ROOF PLAN
